BALL BLADDERS - there are 2 types to choose from:

Standard Latex Bladder:

soft with good rebound. Natural latex, however, has a greater air permeability than butyl rubber. This means that the air leaks faster through the pores. Balls with latex bladders have to be pumped regularly.

Synthetic Butyl Bladder:

the high air impermeability keeps the air pressure at a more constant level. Well suitable for high-quality promotional balls.

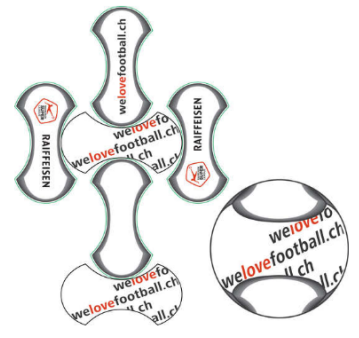

Football production
in SEDEX-, ISO- & ILO- certified production facilities

+++ The different templates shown on this side can be freely selected in any quality without extra price +++

6 Panel Design

for wide logos

logo print on a 6 panel design up to max. 26 cm.

printing is done by digital printing

STITCHED AND GLUED

The *Double Bonded* manufacturing method is a novelty in the football production. It is the combination of two well-known technologies, the stitched and the glued soccer balls. A robust PU outer skin with multi-layered foam lamination and specially protected seams give the ball extremely smooth playing characteristics as well as a high speed. Apart from the visual effect of the protected seams, which are deeper compared to conventionally stitched balls, the additional gluing of the seams between the panels is minimizing the water absorption. The synthetic butyl bladder ensures a more constant ball-pressure and is additionally winded with nylon thread, which prevents the ball from being pumped over. The *Double Bonded* football is a high-quality training- and match ball for use preferably on grass.

Classic template

Print on single panels or alternatively on 'double panels' - these are 2 seamless side by side panels for best possible imprints.

size chart

size	circumf.	weight	players
III	58-60cm	425-475g	men
II	54-56cm	325-375	women & junior
I	50-52cm	290-330g	junior
0	47-48cm	225-300g	mini

Absolute Novelty! Double Bonded Handball.

stitched and glued

The **Double Bonded** production method is an absolute novelty in the handball production. It is the combination of two well-known technologies, the stitched and the glued handballs. The PU outer skin, with **multilayer** foam lamination and specially protected seams, give the ball **extremely** soft playability. It can literally be "grabbed into the ball". The nylon-covered latex bladder also prevents over-pumping of the ball.

self-glueing Handballs

Double Bonded plus self-gluing – more is not possible!

The combination of these two technologies is an unprecedented new sense of touch and surpasses everything you've known so far. Super extreme soft play features plus a maximum of grip, without the use of additional handball glue, give the handball game a whole new ball feeling. **Self-gluing handballs are only available in match ball quality with a grained surface.**

Our **self-gluing technology** is a **further development** of self-gluing handballs already known in the market. The grip is **lasting longer** so that the joy of playing is increased to a maximum. The cleaning of dirt is done here also traditionally with water and a damp cloth, as well as a dab, but after **longer intervals**! Especially where no handball resin is allowed, our new self-adhesive ball technology is a real alternative without any soiling on the hall floors.

High Quality PU Match Handballs

Exclusive designed PU Match handball. ‚Golf ball‘ grain gives an excellent grip. Neoprene lamination offers greater control and a tight grip, where the player grips ‘into’ the ball, ensuring superior handling characteristics. Official sizes.

PU Training- & Match Handballs

Robust and grippy PU training- and match handball. Neoprene lamination enables the player to get a grip ‘into’ the ball, ensuring optimal throwing and catching properties. Official sizes.

Robust School- & Leisure Handballs

Very robust school- & leisure handball made of rubber. Grip surface in any material colour according Pantone without extra price available. Official sizes

Bibs

Introducing:

whether training bib, marker- or steward singlet, vests are a substantially component for a lot of small and big sporting events. We produce and print the shirts already in our foreign productions.
